Microsoft OEM system builder license
(Visit www.microsoft.com/oem for additional OEM System Builder information)

1. Definitions
a. "Customer System" means a fully assembled computer system that includes a CPU, a motherboard, a power supply, an internally mounted NAND or revolving magnetic-based hard drive, and a case. For Server products, a hard drive and separate power supply are not required. A Customer System must meet the system requirements of the Software as posted on http://www.microsoft.com and must be able to run the Software.
b. "Distribution" and "distribute" mean the point in time when a Customer System leaves your control.
c. "OPK" means the OEM preinstallation kit made available to on www.microsoft.com/oem/opk that includes installation instructions for preinstalling the Software.
d. "Pack" means this package of Microsoft Software.
e. "Preinstallation Tools" means the Express Deployment Tool made available to you at www.microsoft.com/oem/opk, and any utilities and tools for preinstalling the Software made available to you in the Pack.
f. "Software" means the Microsoft Software inside the Pack. A unit of Software includes any Software media, documentation, certificate of authenticity ("COA") label, product license terms and security devices.
g. "System Builder" means an original equipment manufacturer, an assembler, a refurbisher, or a software preinstaller that sells the Customer System(s) to a third party.

2. Authorized Distribution and Acceptance. To distribute the Software in this Pack, you must be a System Builder and accept this license. You accept this license when you open this Pack. If you choose not to accept this license, promptly return the unopened Pack to your distributor. You may only distribute unopened Packs within your territory. For the territory in which you may distribute, see www.microsoft.com/oem/sblicense/territory. You must advise your dealers, distributors, and others in your distribution channel of this distribution limitation. Individual units of Software may not be returned after the Pack is opened. Individual units of Software may not be returned after the Pack is opened.

3. Parties. Microsoft Licensing, GP ("MLGP"), a general partnership organized under the laws of the State of Nevada, grants this license to you. However, if you are located in Europe, the Middle East or Africa, then this license is granted by Microsoft Ireland Operations Limited ("MIOL"), a company organized under the laws of Ireland. The terms "we," "our," "us" or "Microsoft" mean either MLGP or MIOL.

4. Limited License. If you comply with the terms of this license, Microsoft grants you a limited license to distribute the Software. Except as granted in this license, you may not use, run, copy, modify, display, distribute, repackage or reassemble the Software, OPK or Preinstallation Tools.

You may not reverse engineer, decompile, or disassemble the Software, OPK or Preinstallation Tools, except to the extent expressly permitted by this license or by applicable law notwithstanding this prohibition. All rights not expressly granted are reserved.

5. Distribution.
a. Software Preinstallation.
i. For each unit of desktop operating system Software in the Pack, you must preinstall one copy of the Software on a Customer System prior to distribution. If the Software includes more than one language version, you must install only one language version.
ii. This preinstallation requirement does not apply to server Software. Instead Server Software may be distributed inside the Customer System package.
iii. For such preinstallation, you must use the OPK. You may use the information and materials in the OPK solely to preinstall the Software in accordance with the OPK. You may not make any changes to the Software unless permitted in the OPK. See www.microsoft.com/oem/opk for additional information about the OPK. You may not distribute the OPK and Preinstallation Tools to the end user. In addition, you may use the Preinstallation Tools we make available to you for preinstalling the Software in accordance with the OPK.
b. You must distribute the complete unit of Software, including the COA.
c. Microsoft Software License Terms. You must distribute the Software pursuant to the product license terms ("License Terms") that accompany it. Under the License Terms, you are the licensor.
d. Alternate versions. The Pack may include more than one platform version of the Software such as 32-bit or 64-bit. You may only preinstall one version but must distribute both versions to the end user.
e. Processor License Requirements.
(i) If the Software in the Pack is licensed per processor, you must distribute a number of licenses equal to or greater than the number of processors in the server, including any processors in a partition where the Software will be run.
(ii) Additional licenses, if available, only include a COA, and no unit of Software or product key. Additional licenses may only be distributed inside the Customer System package.

6. Certificate of Authenticity (COA) Label. You must affix the COA on the front, top, side or back of the Customer System case. If the Customer System is a laptop or tablet PC, the COA must be affixed to the bottom of the Customer System. If a portable Customer System includes a vanity case or "skin" that can be removed and easily replaced with another case or skin by the end user in the normal course of use, then you may affix the COA directly on the bottom of the Customer System under the vanity case or "skin." In that case, you must print "Microsoft COA and product key are located under this removable covering" on the outside of each vanity case or "skin" distributed with the Customer System. You may replace "removable covering" with a more specific word or term that clearly references the vanity case or "skin."

7. End User Support. You must provide end user support for the Software. You must provide support under terms at least as favorable to the end user as the terms that you provide to support any Customer System. At a minimum, you will provide commercially reasonable telephone support.

8. Disclaimer of All Warranties. The Software is licensed "as-is." You bear the risk of using and distributing the Software. Unless required by applicable law, Microsoft gives no express warranties, guarantees or conditions. To the extent permitted under applicable laws, Microsoft excludes the implied warranties or conditions of merchantability, fitness for a particular purpose and non-infringement.

9. Limitation of Liability. Your and our total liability for direct damages under this license is limited to 100% of the amount that you actually paid for the Pack. Microsoft disclaims all liability for lost profits, indirect, consequential, incidental, economic, special or punitive damages. The limitations in this section apply to the Software, and claims for breach of contract, breach of warranty or condition, strict liability or negligence or other tort. The limitations also apply even if you are not fully compensated for any losses, or Microsoft knew or should have known about the possibility of damages. You also release Microsoft from all liability in excess of the limits in this provision. This release includes any claim for indemnification or contribution even if such claims arise under local law. The limitations in this section do not apply to your violation of Microsoft intellectual property rights.

10. Export Restrictions. The Software in this Pack is subject to U.S. and international export laws and regulations. You must comply with all domestic and international export laws and regulations that apply to the Software. These laws include restrictions on destinations, end users and end use. See http://www.microsoft.com/exporting/ for more information.

11. Anti-Piracy. You must not engage in the distribution of pirated software.

12. Important Validation Behavior for Server Software. Use of certain Microsoft® server Software in the Pack validates specific User Account and Active Directory configurations required by the License Terms and continued non-compliance may result in warnings and server shutdown. You must provide the following or substantially similar notice in a clear and conspicuous manner to end users prior to their acquiring this Software:
Certain Microsoft® server technologies included with this server may limit the number of allowed user accounts and/or require certain Active Directory and domain configurations. If not properly configured, the software will generate warnings that will alert you about the behavior of the software in the absence of corrective measures, which may include the periodic shutdown of the server. The warnings and shutdowns will stop once the configuration is corrected. For more information about these features, please review the product-specific documentation located on www.microsoft.com.

13. Geographic Restrictions. Some Software may be licensed for distribution only to specific countries and activation of the Software must occur in those certain countries. See http://www.microsoft.com/geo for details. You must
a. preinstall the Software only within the geographic boundaries of the country or region identified on the Pack, if listed; and
b. provide the following or substantially similar notice in a clear and conspicuous manner to end users prior to their acquiring the Software:
You are only permitted to activate this software in the specific geographic region where you acquired it. You may not be able to activate the software outside of that region. For further information on geographic restrictions, visit http://www.microsoft.com/geo.

14. Compensation. Unless otherwise authorized by Microsoft, you will not advertise, give a separate price for, or otherwise market or distribute the Software as separate from a Customer System. However, you may compensate end users for Software returned to you under the License Terms.

15. Taxes and Other Charges Excluded. You are responsible for any taxes, duties, fees, excises or tariffs imposed on any of your activities in connection with this license. You must pay these charges, taxes and other fees.

16. Severability. If a court of competent jurisdiction finds any provision of this license to be illegal, invalid or unenforceable, the remaining terms will remain in full force and effect.

17. Governing Law. If MLGP grants this license to you (see section 3 above), this license is governed by the laws of the State of Washington, U.S.A. If MIOL grants this license to you, this license is governed by the laws of Ireland.

18. UN Convention. The United Nations Convention on Contracts for the International Sale of Goods does not apply to this license.

19. Non-exclusivity. Nothing in this license restricts you from supporting, promoting, distributing, or using non-Microsoft software.

20. Assignment. Microsoft may assign this license to an affiliated company at any time.

21. Technology Transfer. This license does not create a "technology transfer" agreement, as defined by applicable law because (a) the technology (including any Software) made available under this license is not an integrated part of a technology chain for production or management purposes and (b) the technology (including any Software) will have its own technology license. You will not hold yourself out as our technology recipient and will not attempt to identify us as a technology provider under this license.
